

Win Win Maw

Developer, Commercial Intern

A passionate web developer with experience working with Lyrion innovations, my goal at this point in my career is to learn and grow together with organization that values honesty, responsibility, integrity, result and fairness. I look forward to hearing if I'm a good fit for your position.

Experience

● June 2023 – Present

Shop App MM I Yangon, Myanmar

Commercial Intern

- Conducted research and gathered relevant information to support the content creation process
- Assisted in proofreading, editing, and formatting content to ensure accuracy and consistency
- Assisted in updating product information, ensuring accuracy and completeness
- Conducted on-site photoshoots at various seller's shops to capture high-quality images of products
- Utilized lighting, composition, and equipment effectively to create visually appealing images
- Ensured the timely delivery of uploads using edited photos, meeting the expectation and deadlines set by superiors and sellers
- Handled product uploads using edited photos, ensuring accurate and up-to-date information efficiently
- Researched, prepared and delivered sale reports, requested presentations to superiors
- Followed up sellers for requesting products
- Prioritized tasks effectively to meet deadlines and achieve desired outcomes
- Maintained open communication with the manager and colleagues to seek guidance and provide updates on progress
- Successfully executed additional tasks and responsibilities as assigned by the manager

● February 2022 – April 2022

Lyrion Innovations I Yangon, Myanmar

Web Developer Intern

- Created and implemented well-designed, testable website user interfaces and features based on technical requirements, including navigation menus, contact forms, product lists, shopping cart, search, collapsible accordions, about, and user profiles
- Integrated data from databases using MySQL to improve website functionality and user experience
- Implemented fully-functional websites from scratch using standard HTML, CSS, JavaScript, PHP, Bootstrap, and jQuery practices, incorporating modern design trends and best practices, resulting in faster page load times and improved website performance
- Managed website testing process and implemented bug fixes to improve accessibility and user satisfaction
- Utilized tools such as Git and visual code to streamline the development process and ensure code quality, resulting in faster development times and improved code consistency
